

Andrei Tiumentsev

QA Automation | Playwright / TypeScript

Tel Aviv, Israel | tiumentsev.andrei@gmail.com | tiumentsev.dev

Summary

QA automation professional with 2 years of experience in Russia, using Playwright and TypeScript. Independent product work spans Windows applications, web tools and mobile UX prototypes, connecting interface design with testing and delivery.

Skills

Test automation: Playwright, TypeScript

Product and design: UX/UI design, user flows, interactive prototyping, interface testing

Development workflow: AI-assisted implementation with Codex and Claude, review, testing and deployment

Experience

QA Automation | Russia | 2 years of professional experience

- Used Playwright and TypeScript for automated software testing.

Projects

Independent projects. Responsible for requirements, UX/UI, review, testing and delivery, with AI-assisted implementation using Codex and Claude.

Sidur - Windows staff scheduling application

- Designed workflows for shifts, staffing checks, hours, estimated pay and reports for a kindergarten.
- Application includes Supabase authentication, access roles and cloud synchronization across computers.

tiumentsev.dev/projects/sidur

OlehAI - Mobile UX prototype

- Designed and tested an interactive relocation journey covering priorities, bank comparison and visit preparation, demonstrated with fictional data.

tiumentsev.dev/projects/olehai

Mistfall Atlas - Live web application

- Investigated game formulas using reverse-engineering methods, including decompilation, memory dumps and tests; derived some formulas independently.
- Designed the equipment search and calculators, reviewed implementation, tested key flows and deployed the live site.
